Will Georgia Republicans Show Up For US Senate Runoffs? Stay Home? Boycott? Or Turn-Out In Big Numbers?

Fate of US Senate & Potential Democratic Control of Both Houses of Congress Hang In Balance as Lame-Duck President Plays Hi-Stakes 'Chicken' With GA GOP Election Officials; Here Is Best Runoff Polling Data We Can Offer Given Volatility Preceding Air-Force-One Atlanta Touchdown:

No sense trying to make sense of the 2 runoff elections for United States Senator from Georgia, given tweets from President Donald J. Trump that the runoffs be "called off," given social media drum-beats from Republicans that Trump voters should boycott what could be the 2 most important runoffs in Georgia history, and given an imminent visit from the defeated President which might fire his base or might backfire on his base.

If Republicans keep just 1 of the 2 US Senate seats --- one held by appointed incumbent Kelly Loeffler and the other held by elected incumbent David Perdue --- Mitch McConnell and the Republican party will maintain control of the US Senate and provide a check to Democrat President-Elect Joseph R. Biden. But if Democrats flip both Senate seats, Democrats will control the White House and both Houses of Congress, giving Democrats 2 years to spread their wings and fly. Under GA law, the 01/05/2021 runoffs are required because no one Senate candidate got 50% of the vote in the 11/03/2020 general election.

Against this backdrop, SurveyUSA releases new research, commissioned exclusively by WXIA-TV in Atlanta, which results need to be digested with caution and placed into the proper context, which is that no pollster can solve an equation in which every input is a variable and none of the inputs are constants. That said, as best we make it out at this hour:

In the regularly scheduled runoff between **Perdue** and Democratic challenger Jon **Ossoff** , the candidates run effectively even; Ossoff, at 50%, nominally 2 points ahead of Perdue, at 48%. This lead is within the survey's wiggle room and should not be viewed as anything more than validation that every vote will be critical when on 01/05/2021 Georgia starts counting ballots.

In the simultaneous special runoff to fill the Senate seat vacated by Republican Johnny Isakson, Democratic challenger Raphael **Warnock** has a small but measurable advantage over **Loeffler** , 52% to 45%. Warnock's slight advantage comes almost entirely from Democrats who refuse to consider Loeffler as an acceptable alternative to Warnock. Among Democrats who tell SurveyUSA they are likely to return a ballot in the runoff election, just 1% cross-over for Loeffler. 97% of Democrats stick with Democrat Warnock.

By contrast, in the Ossoff contest, 5% of Democrats cross-over and vote for Perdue. The difference between a 5% defection rate and a 1% defection rate is just enough to explain why Warnock may be in a slightly stronger position than Ossoff, 11 days till early runoff voting begins.

- * White voters give Perdue a 43-point lead and give Loeffler a 37-point lead.
- * Black voters give Ossoff an 87 point advantage and give Warnock (who is black) an 83-point advantage.
- * Perdue holds 96% of the GOP base, Loeffler holds 92%.
- * Ossoff holds 94% of the Democratic base, Warnock holds 97%.
- * Independents split in both contests.
- * Moderates break 3:2 for Ossoff and 2:1 for Warnock.
- * Men give Perdue a 10-point edge; men give Loeffler a 9-point edge.
- * Women give Ossoff an 11-point advantage; women give Warnock a 19-point advantage.
- * Voters younger than age 50 break 5:4 Democrat in both contests.
- * But voters age 50+ like Perdue, while voters age 50+ are less convinced about Loeffler, where the contest is effectively tied.
- * Of Perdue runoff voters, 90% stay with Loeffler, 10% are vulnerable.
- * Of Ossoff runoff voters, 97% vote for Warnock, just 3% are vulnerable.
- * Of those who voted for Trump in the November general election, 97% vote for Perdue, 94% vote for Loeffler.
- * Voters with a 4-year college degree are split in both contests.

* But voters with high school education give Perdue more backing than they give Loeffler.

* Greater Atlanta votes the same way in both contests; a 4 touchdown Democratic edge

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
